

Analytical Products Group, Inc.

Become a GLEMP Participating Laboratory

The Global Laboratory Evaluation and Management Program (GLEMP), is a non profit association comprised of industrial users of commercial laboratory services. Their goal is to increase the confidence of industrial users in their laboratory selection process and reduce the overall expense of managing their contract laboratory program within their corporations.

GLEMP members are industrial companies that are users of commercial laboratory services that seek reliable analytical results from their laboratories. GLEMP supports its members' pursuit of "best in class" laboratory management by providing access to valuable technical information such as performance evaluation (PE) data and accreditation status of participating laboratories.

Laboratories participating in GLEMP will represent those laboratories pursuing quality analytical programs. By proactively participating in the GLEMP PE program, the participating labs are demonstrating to their clients and potential clients their commitment to self-directed quality improvement.

GLEMP is endorsed by CHWMEG, another non-profit organization which was formed in 1995. CHWMEG is comprised of over 165 member enterprises, and consists of over 360 separate companies representing a wide-range of industrial operations. As a result of their endorsement of GLEMP, all CHWMEG members have been offered charter membership in GLEMP.

APG will offer the two PE studies in 2006. Laboratories can demonstrate a continuing commitment to quality improvement by adding additional APG PE studies to their GLEMP profile.

Laboratory Benefits:

- Demonstrate Excellence to Industrial Members that can influence buying decisions.
- Reach Corporate Industrial accounts including many Fortune 100 companies.
- Market to GLEMP Members on quality not just price through your GLEMP website profiles.
- Increase your return on your PT investment by using GLEMP studies for STATE/NELAC accreditation.
- Validate consistent quality across your laboratory network.
- Demonstrate laboratory expertise and unique technical capability
- Present state certification, accreditation and capabilities to GLEMP members along with your sales, and technical contacts.

Become a GLEMP Laboratory Member

In the past many laboratories have said that NELAC accreditation has leveled the playing for analytical laboratories making all NELAC laboratories appear equally capable. Laboratories of Excellence now have a tool through GLEMP to separate themselves from other less qualified accredited laboratories.

What laboratory data will GLEMP member be able to access? GLEMP members will access Performance Maps based on their particular critical analytes and then select laboratories that are most qualified to perform those analyses. Laboratories close to the mean, or assigned value, demonstrate defensible capabilities. GLEMP Members can drill down to Analyte Trend graphs to understand how laboratories performance on their critical analytes over time.
