

Did you receive a **“Not Acceptable”** result on your DMRQA PT test?

Call APG for help with remediation!

The EPA mandates the following in the 308 DMRQA Announcement Letter:

14. Investigate any discrepancies or “Not Acceptable” evaluations reported by your PT Provider. You must identify and report the causes and your system changes to correct the discrepancies and avoid their reoccurrence. If necessary, purchase samples and perform the verification analysis before December 5, 2008. The report must include the results of any verification analysis performed. This report must be sent to your state DMR-QA coordinator by December 5, 2008. Submit the report so the delivery and receipt of the report can be tracked.

APG wants to help you meet your accreditation requirements. You have several options available to remediate by the deadline:

Wastewater PT Studies

You can participate in the September or October WP studies. Order online at www.APGQA.com or use the enclosed order form. Here is the study schedule:

September WP

Open 9/2/08 Close 10/15/08

October WP

Open 10/1/08 Close 11/10/08

Monthly studies are available for extended remediation.

PT Stat Samples

Receive an instant result when you run a quick turnaround PT STAT sample. Simply run your analysis, enter your data online, and instantly receive your evaluation!

Quality Control Standards

Quality controls can help you identify the problem and verify your analysis. APG QC samples are supplied with a complete Certificate of Analysis. As part of your normal quality control program, you can evaluate your performance internally to ensure your analysis is correct.
